  - SimulView™ technology presents twice the fun: 2-player games with no split screen.<sup>7</sup>
  - Stream HD entertainment wirelessly with built-in Wi-Fi®<sup>3</sup>
  - PC and tablet content on your TV w/ Intelligent Connect<sup>8</sup>
  - Media Remote™ app to control your TV with a smartphone<sup>9</sup>
- 

### Features

#### **At four times the resolution, it's like you're there**

The largest, highest resolution picture Sony has ever produced on a TV. With four times more resolution than Full HD, the 84" (diag.) 4K LCD screen contains no less than 8 million individual pixels (3,840 x 2,160).<sup>1</sup> Advanced picture processing ensures that every one of those pixels displays images with superb quality. At a closer, more comfortable distance and a viewing angle widened to 60°, the TV screen fills your field of vision: it's like experiencing the action in real life.<sup>2</sup>

#### **TV that looks like real life**

Suddenly, everything looks better. Experience stunning picture quality, whether you're watching native 4K video or low-resolution smartphone clips. The newly-developed XCA8-4K chip upscales HD (or lower resolution) images by analyzing and refining images from all sources.<sup>10</sup> Everything you see is restored with beautiful, natural detail, richer color and stunning contrast. The latest Reality Creation database and Super Resolution processing breathes new life into everything you see with phenomenal 4K (3,840 x 2,160) resolution.

#### **Immersive sound**

A big screen is nothing without big sound. Totalling 50W<sup>4</sup>, the front-facing, 2-way, 10-Unit Speaker system directs sound right at you. Soft dome tweeters deliver crisp highs while mid-range units and four sub-woofers fill the sound field with dramatic bass. S-Force® Front Surround 3D simulates 5.1 sound, with an enlarged sweet spot that everyone in the room can enjoy. Rigid aluminum speaker housings cut resonance for smooth, vibration-free audio.

### **Custom-install ready**

Even your installer will be impressed. RS232 and IR in allow for custom control and easy setup. Leading control companies, including Control 4, have certified this television to allow for simple integration with custom install systems.

### **3D on a grand scale**

There's 3D, then there's 3D with 4K (3,840 x 2,160). Larger-than-life images emerge from the massive 84" (diag.) screen with realism that makes your heart race. The level of detail is absolutely stunning—it's the closest thing to a 3D theater in your living room. Light, comfortable, passive 3D glasses offer superb image quality and a noticeable step above anything you've ever experienced at home.<sup>5</sup>

### **Lifelike motion**

Watch the sprinter break off the blocks and race smoothly as the camera follows him from left to right. Even quick motion seen in action movies appears amazingly realistic as Motionflow™ XR 960 technology, which takes motion clarity beyond refresh rates, smoothes out the picture where the camera can't for clearer and more natural movement.

### **Go way beyond cable.**

Welcome to the endless entertainment of the Sony Entertainment Network, where thousands of movies, TV shows, online videos, games and music are always at your fingertips. By connecting to the Internet you can access Full HD 1080p entertainment, 3D content and made-for-TV apps like Netflix®, Pandora®, YouTube™, Facebook® and more.<sup>3</sup>

### **Photos are better with 4K**

Enjoy your photos in amazing 4K resolution (3,840 x 2,160) on the immersive 84" (diag.) screen. Add extra polish to your pictures with fun, artistic effects.

View, share and edit photo memories with PlayMemories Studio™ software and your PlayStation®3 system on the TV screen. Scroll effortlessly through your image collection. Pinpoint images by date and time, smiles or location.

Everything's smooth and speedy, thanks to the immense processing power of PlayStation®3 system.<sup>6</sup>

### **Twice the fun: 2-player games with no split screen**

Say goodbye to split screen. Now you and a friend can both experience your own big-screen view of the action as you play nail-biting games on your PlayStation®3 system. SimulView™ gaming presents two separate Full HD pictures: each player watches independently through light easy to wear Simulview glasses that don't need batteries.<sup>7</sup> There's already a growing choice of SimulView™ game titles available.

### **Goodbye wires, hello built-in Wi-Fi®**

Maximize your entertainment while reducing cable clutter. Wirelessly stream beautiful, HD entertainment straight from the internet or your home network using built-in Wi-Fi® connectivity.<sup>3</sup>

### **All devices, together as one**

Don't all of your personal photos and videos deserve the big screen? Experience your content on a grand scale simply by connecting your compatible smartphone, computer or Xperia™ Tablet S via your existing Wi-Fi® network. Then you can easily "throw" your videos, photos and music files to your HDTV.<sup>8</sup>

### **Control your TV with your phone**

Now there's one less remote control on the coffee table. Just download the free Media Remote™ app and turn your iPhone®, Android™ phone or Xperia™ Tablet S into a versatile remote control with a full QWERTY keyboard.<sup>3</sup> It makes changing channels and typing searches ultra-fast and convenient.
